BREEDE VALLEY MUNICIPALITY Annual Financial Statements for the year ended 30 June 2014 (2013 Restated)

Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are responsible for reporting on the fair presentation of the financial statements and related financial information.

The financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practices (GRAP), issued by the Accounting Standards Board in accordance with Section 122 (3) of the Municipal Finance Management Act (Act No 56 of 2003).

The financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control, established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control almed at reducing the risk of error or financial statements in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the financial statements, However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or financial statements.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2014 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The financial statements are prepared on the basis that the municipality is a going concern and that the municipality has neither the intention nor the need to fiquidate or curtail materially the scale of the municipality.

The external auditors are responsible for auditing & Reporting on the municipality's financial statement.

Although the accounting officer is primarily responsible for the financial affairs of the municipality, he is supported by the municipality's auditors.

Accounting Officer's Report

The accounting officer submits his report for the year ended 30 June 2014.

Review of activities

Main business and operations

Breede Valley Municipality is situated in the Western Cape Province, 120 km north-east of Cape Town. Included in its boundaries are Worcester, Rawsonville, De Doorns and Touwsriver and surrounding rural areas. It covers 3833 sq. km and is home to around 166 825 people.

The municipality is set between three mountain ranges, incorporating some of the most valuable and fertile agricultural land in the country. The area is endowed with a diverse cultural history, regional accessibility and unique natural beauty that attract a great number of tourists.

The operating results for the year were pleasing for the following reasons; the financial position of the municipality is described to be sound, with an accumulated surplus of R 1,625,092,277 at yearend.

Net Surplus of the municipality is R 66,553,138 (2013: Restated surplus R 44,915,281). The overall summarised operating results for the Municipality in comparison to the approved budget are shown in the Statement of Financial Performance and also reflects a summary of income and expenditure. The segmental operating results are shown in Appendix G (A2) to the Financial Statements.

Going concern 2

The financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business. The solvency analyses show that the assets cover the liabilities by 370.79% (2013: 370.89%). The coverage indicates that the Municipality operate's as a going concern.

Subsequent events 3

- 1. During July 2014 movable assets to the value of R 381,868 was acquired from Worcester Agricultural Association (Kleinplasie) of which an settlement amount of R 20,000 was paid by the municipality.
- 2. Irregular expenditure was condoned at the Council meeting held on the 26th August 2014.
- 3. A settlement agreement for the contingent asset of SARS regarding the dispute with SARS regarding VAT has been reached.

Accounting policies 4

The financial statements have been prepared in accordance with the prescribed Standards of Generally Recognised Accounting Practices (GRAP) issued by the Accounting Standards Board as the prescribed framework by National Treasury.

Borrowings, Investments and Cash 5

The accounting officer may after approval of Council exercise all the powers of the municipality to borrow money, as he considers appropriate needs. Interest-bearing debt did not increase in the year ended 30 June 2014 to finance the Municipality's infrastructure capital programme. In the financial year ended 30 June 2014, the Municipality redeemed interest-bearing debt of R 27,973,367. The interest paid on borrowings as percentage of total expenditure is 3.84% (2013: 3.87%).

5

5 Borrowings, Investments and Cash (continued)

Investment as 30 June 2014 amounted to R 85,000,000 (2013: R 30,000,000). Investments and cash equivalents increased by R 151,988,865 to R 167,173,774.

Additional information regarding loans, investments and cash and cash equivalents is provided in notes 6, 12, 13 and Appendix A to the Financial Statements.

6 Capital expenditure

The capital expenditure incurred during the year amounted to R 127,824,963 (2013: R 107,618,450) which represented 90.01% (2013: 78%) of the approved capital budget, R 142,011,455 (2013: R 138,345,278). A complete analysis of capital expenditure (budgeted and actual) per functional area is included in Appendix J(A5), while Appendix B contains detail according to asset class. More details regarding external loans used to finance fixed assets are shown in Appendix A.

7 Cash flow analysis

Cash generated from operating activities increased from R 122,488,424 to R 161,627,108 in 2014.

Summary of net cash flows

Tallinary of hot cash nows		
	2014	2013
	R	R

equivalents	(39 815 091)	56 328 891

8 Credit rating

The Entity was rated by Moody's Investor Services during the previous financial year. Their rating and outlook for the Municipality was a Baa1.za rating due to the negative outlook on South Africa sovereign rating. To monitor our credit rating and capacity for long-term financing we consider various qualitative and quantitative factors. At 30 June 2013 and 30 June 2014, the current ratio was 1.71:1 and 1.53:1 respectively. This reflects a slight decrease in the ratio.

9 Accounting Officer

The accounting officer of the municipality during the year under review of this report is as follows:

Name G.F. Matthyse (employed March 2012)

Nationality South African

10 Auditors

Auditor-General of South Africa will continue in office for the next financial period.

BREEDE VALLEY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directions, issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand, All figures have been rounded to the nearest Rand.

Assets, liabilities, revenues and expenses were not offset, except where offsetting is either required or permitted by a Standard of GRAP.

A summary of the significant accounting policies are disclosed below.

These accounting policies are consistent with the previous period, except for the changes set out in the note - Changes to the annual financial statements.

1.1 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.2 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Receivables

The municipality assesses its receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the municipality makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for trade and other receivables is based on a historic payment ratio per consumer.

Fair value estimation

The carrying value less impairment provision of short term trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the municipality for similar financial instruments.

The fair value of long term receivables is estimated by discounting the future contracted cash flows at the current market interest rate that is available to the municipality for similar financial assets.

Impairment testing

Value in use of cash and non-cash generating assets

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. If there are indications that impairment may have occurred, the remaining service potential of the asset is determined. The most appropriate approach selected to determine the remaining service potential is dependent on the availability of data and the nature of the impairment.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.2 Significant judgements and sources of estimation uncertainty (continued)

Provisions

Landfill sites

The provision for rehabilitation of the landfill site is recognised as and when the environmental flability arises. The provision is calculated by a qualified environmental engineer. The provision represents the net present value of the expected future cash flows to rehabilitate the landfill site at year-end. To the extent that the obligations relate to an asset, it is capitalised as part of the cost of those assets. Any subsequent changes to an obligation that did not relate to the initial related asset are charged to the Statement of Financial Performance.

Additional disclosure of these estimates are included in note 15 Provision.

Staff leave

Staff leave is accrued to employees according to collective agreements. Provision is made for the full cost of accrued leave liability at reporting date. This accrual will be realised as employees take leave or when employment is terminated.

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note - Provisions.

Post retirement benefits

The present value of the post retirement medical obligation and long service awards depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty. Any changes in these assumptions will impact on the carrying amount of employee benefits.

Other key assumptions for employee benefits are based on current market conditions. Additional information is disclosed in Note - Employee Benefits.

Effective Interest rate

The municipality used the prime rate to discount future cash flows.

Allowance for impairment

For receivables an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the receivables carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

intangible assets

The useful lives of intangible assets are based on management's estimation. Management considers the impact of technology, availability of capital funding, service requirements and required return on assets to determine the optimum useful life expectation, where appropriate.

7014 -11- 18

BREEDE VALLEY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.2 Significant Judgements and sources of estimation uncertainty (continued)

Property, plant and equipment

The useful lives of property, plant and equipment are based on management's estimation. Infrastructure's useful lives are based on technical estimates of the practical useful lives for the different infrastructure types, given engineering technical knowledge of the infrastructure types and service requirements. For other assets and buildings management considers the impact of technology, availability of capital funding, service requirements and required return on assets to determine the optimum useful life expectation, where appropriate. The estimation of residual values of assets is also based on management's judgement whether the assets will be sold or used to the end of their useful lives, and in what condition they will be at that time.

Management referred to the following when making assumptions regarding useful lives and residual values of property, plant and equipment:

- The useful life of movable assets was determined using the age of similar assets available for sale in the active market. Discussions with people within the specific industry were also held to determine useful lives.
- Local Government Industry Guides was used to assist with the deemed cost and useful life of infrastructure assets.
- The municipality referred to buildings in other municipal areas to determine the useful life of buildings. The
 municipality also consulted with engineers to support the useful life of buildings, with specific reference to the structural
 design of buildings.

Revenue Recongnition - Fines

The Accounting policy on Revenue from Non-Exchange Transactions and Revenue from Exchange Transactions describes the conditions under which revenue will be recognised by management of the Municipality.

In making their judgement, management considered the detailed criteria for the recognition of revenue as set out in GRAP 9: Revenue from Exchange Transactions and GRAP 23: Revenue from Non-Exchange Transactions along with IGRAP 1: Applying the probability test on initial recognition of Revenue. The basic principles used and the assumptions made relating to traffic fines is disclosed in the accounting policy for Revenue from Non-Exchange Transactions.

1.3 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services; or
- administrative purposes; or
- sale in the ordinary course of operations.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

The cost of self-constructed investment property is the cost at the date of completion.

Transfers are made to or from investment property only when there is a change in use. From a transfer from investment property to owner occupied property (property, plant and equipment), the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner occupied property becomes an investment property, the entity accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

Where investment property is acquired at no cost, or for a nominal cost, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.3 Investment property (continued)

Fair value

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises,

If the municipality determines that the fair value of an investment property under construction is not reliably determinable but expects the fair value of the property to be reliably measurable when construction is complete, it measures that investment property under construction at cost until either its fair value becomes reliably determinable or construction is completed (whichever is earlier). If the municipality determines that the fair value of an investment property (other than an investment property under construction) is not reliably determinable on a continuing basis, the municipality measures that investment property using the cost model (as per the accounting policy on property, plant and equipment). The residual value of the investment property is then assumed to be zero. The municipality applies the cost model (as per the accounting policy on property, plant and equipment) until disposal of the investment property.

Once the municipality becomes able to measure reliably the fair value of an Investment property under construction that has previously been measured at cost, it measures that property at its fair value. Once construction of that property is complete, it is presumed that fair value can be measured reliably. If this is not the case, the property is accounted for using the cost model in accordance with the accounting policy on Property, plant and equipment.

The municipality used a valuation expert namely De Kock Lloyd to determine the fair value at the reporting date.

Investment property is derecognised when there is a disposal or no future economic benefits or service potential are to be derived from the property. All gains and losses, which result from the derecognition, are recognised in the Statement of Financial Performance.

1.4 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost or fair value of the item can be measured reliably.

Property, plant and equipment are initially recognised at cost at the acquisition date.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the neccesary costs of dimantling and removing the asset and restoring the site on which it is located.

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost), unless the fair value of neither the asset received nor the asset given up is reliably measurable. If the acquired item is not measured at fair value, it's cost is measured at the carrying amount of the asset given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

7014 -11- 2 6

BREEDE VALLEY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.4 Property, plant and equipment (continued)

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the municipality is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment are carried at cost less accumulated depreciation and any impairment losses.

Land is not depreciated as it is deemed to have an indefinite useful life.

Where the municipality replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component. Subsequent expenditure incurred on an asset is capitalised when it increases the capacity or future economic benefits associated with the asset.

Property, plant and equipment are depreciated on a straight line basis over their expected useful lives to their estimated residual value. Depreciation is calculated on the depreciable amount.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Average useful life
Infrastructure	
Roads and Paving	5 - 80 years
Pedestrian Malls	20 years
 Electricity 	5 - 25 years
• Water	15 - 100 years
Sewerage	15 - 75 years
Housing	20 - 100 years
Landfill sites	5 - 55 years
Cementeries	25 - 60 years
Community	
Buildings	10 - 100 years
Recreational facilities	15 - 100 years
Security	3 - 25 years
Other assets	
 Furniture and fixtures 	2 - 20 years
 Specialised property, plant and equipment 	5 - 20 years
Other equipment	5 - 20 years
Computer hardware	3 - 10 years
Watercraft	3 - 10 years
Other items of plant and equipment	3 - 20 years
Bins and containers	5 - 15 years
 Library books 	1 - 5 years
Transport assets	
Other vechicles	5 - 30 years
 Specialist vehicles 	5 - 30 years

The residual value, useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Reviewing the useful life of an asset on an annual basis does not require the municipality to amend the previous estimate unless expectations differ from the previous estimate.

11.12 4.15

BREEDE VALLEY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.4 Property, plant and equipment (continued)

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

1.5 Site restoration and dismantling cost

The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which the municipality incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) If the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

1.6 Intangible assets

An asset is identifiable if it either:

- Is separable, i.e. is capable of being separated or divided from the municipality and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the municipality intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Intangible assets are initially recognised at cost.

Where an intangible asset is acquired at no cost, or for a norninal cost, its cost is its fair value as at the date of acquisition.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

J. M. W.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.6 Intangible assets (continued)

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- It is technically feasible to complete the asset so that it will be available for use or sale;
- there is an intention to complete and use or sell it;
- there is an ability to use or sell it;
- it will generate probable future economic benefits or service potential:
- there are available technical, financial and other resources to complete the development and to use or sell the
 asset; and
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date and any changes are recognised as a change in accounting estimate in the Statement of Financial Performance.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intancible assets.

Amortisation is provided to write down the intangible assets, on a straight line basis to their estimated residual values, as follows:

item Computer software Useful life

3 - 5 years

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of an intangible asset is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the intangible asset. Such difference is recognised in surplus or deficit when the intangible asset is derecognised.

1.7 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

An impairment loss of a cash-generating asset is the amount by which the carrying amount of an asset exceeds its recoverable amount.

Recognition

The municipality recognises a heritage asset as an asset when it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value can be measured reliably.

Where the municipality holds a heritage asset, but on initial recognition it does not meet the recognition criteria because it cannot be reliably measured, information on such a heritage asset is disclosed in note - Heritage assets.

Initial measurement

Heritage assets are initially recognised cost.

Where a heritage asset is acquired at no cost, or for a nominal cost, its cost is its fair value as at the date of acquisition.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.7 Heritage assets (continued)

Subsequent measurement

Heritage assets are not depreciated based on their nature, however the municipality assesses at each reporting date whether there is a need for Impairment.

The class of heritage assets are carried at cost less any accumulated impairment losses.

Impairment

The municipality assesses at each reporting date whether there is an indication that a heritage asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Transfers

Transfers from heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage assets are only made when the asset meets the definition of a heritage asset.

Derecognition

Heritage assets are derecognised on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the heritage asset. Such difference is recognised in surplus or deficit when the heritage asset is derecognised.

1.8 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

Financial instruments recognised on the Statement of Financial Position include receivables (both from exchange transactions and non-exchange transactions), cash and cash equivalents, annuity loans and payables (both from exchange and non-exchange transactions).

Classification

The municipality has the following types of financial assets (classes and category) as reflected on the face of the Statement of Financial Position or in the notes thereto:

Class

Long term receivables
Receivables from exchange transactions
Receivables from non-exchange transactions
Cash and cash equivalents

Category

Financial asset measured at amortised cost Financial asset measured at amortised cost Financial asset measured at amortised cost Financial asset measured at amortised cost

The municipality has the following types of financial liabilities (classes and category) as reflected on the face of the Statement of Financial Position or in the notes thereto:

Class

Long term liabilities
Payables from exchange transactions
Payables from non-exchange transactions

Category

Financial liability measured at amortised cost Financial liability measured at amortised cost Financial liability measured at amortised cost

2001 - 11- 7-6

BREEDE VALLEY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.8 Financial instruments (continued)

Initial recognition

The municipality recognises a financial asset or a financial liability in its Statement of Financial Position when the municipality becomes a party to the contractual provisions of the instrument.

The municipality recognises financial assets using trade date accounting.

Upon initial recognition the municipality classifies financial instruments or their component parts as a financial liability, financial asset or residual interest in conformity with the substance of the contractual arrangement and to the extent that the instrument satisfies the definitions of a financial liability, a financial asset or a residual interest.

Initial measurement of financial assets and financial liabilities

The municipality measures a financial asset and financial liability, other than those subsequently measures at fair value, initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The municipality measures all other financial assets and financial liabilites initially at fair value.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.8 Financial instruments (continued)

Subsequent measurement of financial assets and financial liabilities

The municipality measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost
- Financial instruments at cost.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibality in the case of a financial asset.

Fair value measurement considerations

The fair values of quoted investments are based on current bid prices. If the market for a financial asset is not active (and for unlisted securities), the municipality establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, and option pricing models making maximum use of market inputs and relying as little as possible on entity-specific inputs.

Short-term receivables and payables are not discounted where the initial credit period granted or received is consistent with terms used in the public sector, either through established practices or legislation.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

impairment and uncollectability of financial assets

All financial assets measured at amortised cost, or cost, are subject to impairment review.

The municipality assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

For amounts due to the municipality, significant financial difficulties of the receivable, probability that the receivable will enter bankruptcy and default of payments are all considered indicators of impairment.

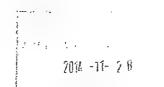

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Where financial assets are impaired through the use of an allowance account, the amount of the loss is recognised in surplus or deficit within operating expenses. When such financial assets are written off, the write off is made against the relevant allowance account. Subsequent recoveries of amounts previously written off are credited against operating expenses.

Financial assets measured at cost:

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.8 Financial instruments (continued)

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Trade and other receivables

Consumer debtors

Consumer debtors are recognised initially at cost and subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for impairment of consumer debtors is established when there is objective evidence that the municipality will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the consumer debtor is impaired. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the deficit is recognised in the Statement of Financial Performance. When a consumer debtor is uncollectable, it is written off against the allowance account for consumer debtors. Subsequent recoveries of amounts previously written-off are credited against the Statement of Financial Performance.

Housing selling schemes, Housing Personnel, Welfare, Recreational and Land sales

in respect of the above loans a provision for impairment is made on the same basis as the current portion included in consumer debtors, being the payment rate.

Other debtors

Other debtors consist among others of various debtors and / or suspense accounts with debit balances such as Housing board subsidies, Government subsidies, Interest receivable, VAT, Recoverable expenses, Prepaid expenses, Insurance claims and various other debtors / suspense accounts with debit balances. These aforementioned debtors / suspense accounts are assessed individually for impairment to ensure that no objective evidence exists that these debtors are irrecoverable. Should an individual debtor or group of debtors and or suspense account be regarded as irrecoverable, a provision for impairment is made.

Cash and cash equivalents

Cash includes cash on hand and demand deposits, and other short-term highly liquid investments that are readily convertible into known amounts of cash that are held with registered banking institutions and are subject to an insignificant risk of changes in value. The municipality categorises cash and cash equivalents as financial assets: loans and receivables.

For the purpose of cash flow statement, cash and cash equivalents comprise cash on hand deposits held on call with banks and investments in financial instruments, net of bank overdrafts and excluding fixed deposits.

Trade and other payables

Trade payables are initially measured at fair value plus transaction costs that are directly attributable to the acquisition and are subsequently measured at amortised cost using an effective interest rate, which is the initial carrying amount, less repayments, plus interest.

Financial liabilities and consumer deposits

The municipality measures all financial liabilities including trade and other payables, at amortised cost using the effective interest rate method. Financial liabilities include borrowings, other non-current liabilities (excluding provisions) and trade and other payables (excluding provisions). Interest-bearing external loans and bank overdrafts are recorded net of direct issue costs. Finance charges, including premiums payable, are accounted for on an accrual basis.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.8 Financial instruments (continued)

Derecognition

Financial assets

The municipality derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has
 transferred control of the asset to another party and the other party has the practical ability to sell the asset in its
 entirety to an unrelated third party, and is able to exercise that ability unitaterally and without needing to impose
 additional restrictions on the transfer. In this case, the municipality:
 - derecognises the asset; and
 - recognises separately any rights and obligations created or retained in the transfer.

The carrying amount of the transferred asset is allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and deracognised is recognised in surplus or deficit in the period of the transfer.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or delicit.

Financial liabilities

The municipality removes a financial liability (or a part of a financial liability) from its Statement of Financial Position when it is extinguished - i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and

1.9 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and building elements, the municipality assesses the classification of each element separately.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.9 Leases (continued)

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the Statement of Financial Position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the Statement of Financial Position as a finance lease obligation.

In discounting the lease payments, the municipality uses the interest rate that exactly discounts the lease payments to the fair value of the asset plus any direct costs incurred.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are recognised separately as an expense in the period in which they are incurred.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term. The difference between the amounts recognised as revenue and the contractual receipts are recognised as an operating lease asset or liability.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

Any contingent rents are recognised separately as revenue in the period in which they are received.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis over the lease term.

Any contingent rents are recognised separately as an expense in the period in which they are incurred.

1.10 Inventories

inventories comprise current assets held for sale, consumption or distributing during the ordinary course of business.

Inventories are initially measured at cost except where inventories are acquired at no cost, or for a nominal cost, then their costs are their fair value as at the date of acquisition. Housing top structures are carried at the lower of cost and current replacement cost.

Subsequently inventories consisting of consumable stores and finished goods, are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for:

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

STTA

BREEDE VALLEY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.10 Inventories (continued)

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

1.11 Non-current assets held for sale and disposal groups

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets held for sale (or disposal group) are measured at the lower of its carrying amount and fair value less costs to sell.

A non-current asset is not depreciated (or amortised) while it is classified as held for sale, or while it is part of a disposal group classified as held for sale.

Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale are recognised in surplus or deficit.

Non-current assets and disposal groups held for sale are derecognised upon disposal of the item or where no further economic benefits or service potential is expected to flow from the asset or disposal group. Gains/tosses that result from the derecognition of non-current assets or disposal groups held for sale are recognised in surplus/deficit in the period of the derecognition.

1.12 Impairment of cash-generating assets

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also tests a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.12 Impairment of cash-generating assets (continued)

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.12 Impairment of cash-generating assets (continued)

Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cashgenerating unit are affected by internal transfer pricing, the municipality uses management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

the future cash inflows used to determine the asset's or cash-generating unit's value in use; and

the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

in allocating an impairment loss, the municipality does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that noncash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

70% -11- 26

BREEDE VALLEY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.12 Impairment of cash-generating assets (continued)

Reversal of impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

1.13 Impairment of non-cash-generating assets

Non-cash-generating assets are assets other than cash-generating assets.

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also tests a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.13 impairment of non-cash-generating assets (continued)

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating asset is determined using the following approach:

Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

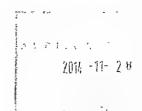

Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.14 Employee benefits

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the
 absences is due to be settled within twelve months after the end of the reporting period in which the employees
 render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the municipality during a reporting period, the municipality recognises the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the
 undiscounted amount of the benefits, the municipality recognises that excess as an asset (prepaid expense) to the
 extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The municipality measures the expected cost of accumulating compensated absences as the additional amount that the municipality expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The municipality recognises the expected cost of bonus, incentive and performance related payments when the municipality has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the municipality has no realistic alternative but to make the payments.

Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which the municipality provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employes the employees concerned.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.14 Employee benefits (continued)

Post-employment benefits: Defined contribution plans

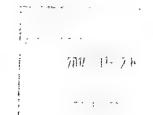

When an employee has rendered service to the municipality during a reporting period, the municipality recognises the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid
 exceeds the contribution due for service before the reporting date, the municipality recognises that excess as an
 asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or
 a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

The municipality provides retirement contribution for its employees and councillors.

A defined contribution plan is a plan under which the municipality pays fixed contributions into a separate entity. The municipality has no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to service in the current or prior periods.

A defined benefit plan is a plan that is not a defined contribution plan, Typically defined benefit plans define an amount of benefit that an employee will receive after retirement, usually dependent on one or more factors such as age, years of service and compensation.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.14 Employee benefits (continued)

Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

The defined benefit plan of the municipality includes post retirement medical aid benefits.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the municipality recognises actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the municipality recognises past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The return on plan assets is interest, dividends or similar distributions and other revenue derived from the plan assets, together with realised and unrealised gains or losses on the plan assets, less any costs of administering the plan (other than those included in the actuarial assumptions used to measure the defined benefit obligation) and less any tax payable by the plan itself.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement

The amount determined as a defined benefit liability may be negative (an asset). The municipality measures the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the plan or reductions in future
 contributions to the plan. The present value of these economic benefits is determined using a discount rate which
 reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit.

The municipality determines the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The municipality recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost:
- interest cost;
- · the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses, which is recognised immediately;
- past service cost, which is recognised immediately;
- · the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.14 Employee benefits (continued)

The municipality uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

In determining the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost, the municipality attributes benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, the municipality attributes benefit on a straight-line basis from:

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service); until
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The municipality recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- any resulting change in the present value of the defined benefit obligation; and
- any resulting change in the fair value of the plan assets.

Before determining the effect of a curtailment or settlement, the municipality re-measures the obligation (and the related plan assets, if any) using current actuarial assumptions (including current market interest rates and other current market prices).

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The municipality offsets an asset relating to one plan against a liability relating to another plan when the municipality has a legally enforceable right to use a surplus in one plan to settle obligations under the other plan and intends either to settle the obligations on a net basis, or to realise the surplus in one plan and settle its obligation under the other plan simultaneously.

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
- those changes were enacted before the reporting date; or
- past history, or other reliable evidence, Indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.14 Employee benefits (continued)

Other long-term employee benefits

The municipality has an obligation to provide long-term service allowance benefits to all of its employees. According to the rules of the long-term service allowance scheme, which the municipality instituted and operates, an employee (who is on the current conditions of service), is entitled to a cash allowance, calculated in terms of the rules of the scheme, after 10, 15, 20, 25 and 30 years of continued service.

The municipality's liability is based on an actuarial valuation. The Projected Unit Credit Method is used to value the liabilities. Actuarial gains and losses on the long-term service awards are recognised in the Statement of Financial Performance.

The amount recognised as a liability for long-term service awards is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- . minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

The municipality recognises the net total of the following amounts as expense or revenue, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost:
- interest cost:
- the expected return on any plan assets and on any reimbursement right recognised as an asset;
- actuarial gains and losses, which is recognised immediately;
- past service cost, which is recognised immediately; and
- · the effect of any curtailments or settlements.

Termination benefits

The municipality recognises termination benefits as a liability and an expense when the municipality is demonstrably committed to either:

- terminate the employment of an employee or group of employees before the normal retirement date; or
- provide termination benefits as a result of an offer made in order to encourage voluntary redundancy.

The municipality is demonstrably committed to a termination when the municipality has a detailed formal plan for the termination and is without realistic possibility of withdrawal. The detailed plan includes [as a minimum]:

- the location, function, and approximate number of employees whose services are to be terminated;
- the termination benefits for each job classification or function; and
- the time at which the plan will be implemented.

Implementation begins as soon as possible and the period of time to complete implementation is such that material changes to the plan are not likely.

Where termination benefits fall due more than twelve months after the reporting date, they are discounted using an appropriate discount rate. The rate used to discount the benefit reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the benefit.

In the case of an offer made to encourage voluntary redundancy, the measurement of termination benefits is based on the number of employees expected to accept the offer.

1.15 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event:
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.15 Provisions and contingencies (continued)

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating expenditure.

If the municipality has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

A constructive obligation to restructure arises only when the municipality:

- has a detailed formal plan for the restructuring, identifying at least:
 - the activity/operating unit or part of a activity/operating unit concerned;
 - the principal locations affected;
 - the location, function, and approximate number of employees who will be compensated for services being terminated:
 - the expenditures that will be undertaken; and
 - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the municipality

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality.

- a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality; or
 - a present obligation that arises from past events but is not recognised because: - it is not probable than an outflow of resources embodying economic benefits or service potential will be required to settle the obligation:
 - the amount of the obligation cannot be measured with sufficient reliability.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 41 Contingencies in the annual financial statements. .

2012 - 11- 78

BREEDE VALLEY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.15 Provisions and contingencies (continued)

Decommissioning, restoration and similar liability

Changes in the measurement of an existing decommissioning, restoration and similar liability that result from changes in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in the discount rate, is accounted for as follows:

If the related asset is measured using the cost model:

- changes in the liability is added to, or deducted from, the cost of the related asset in the current period;
- the amount deducted from the cost of the asset does not exceed its carrying amount. If a decrease in the liability
 exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit;
- If the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If there is such an indication, the municipality tests the asset for impairment by estimating its recoverable amount or recoverable service amount, and accounts for any impairment loss, in accordance with the accounting policy on impairment of assets as described in accounting policy 1.12 and 1.13.

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability is recognised in surplus or deficit as they occur.

The periodic unwinding of the discount is recognised in surplus or deficit as a finance cost as it occurs.

1.16 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

Revenue from exchange transactions refers to revenue that accrued to the municipality directly in return from services rendered/goods sold, the value of which is approximates the consideration received or receivable, excluding indirect taxes, rebates and discounts.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.16 Revenue from exchange transactions (continued)

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Service charges relating to electricity and water are based on consumption and basic charge as per Council resolution. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognized as revenue when invoiced or accrued to the municipality. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period.

Revenue from the sale of electricity prepaid cards is recognised when all the following conditions have been satisfied:

- The municipality has transferred to the buyer the significant risks and rewards of ownership of the goods.
- The municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality.
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage and are levied monthly based on the number of refuse containers on each property, regardless of whether or not all containers are emptied during the month.

Service charges from sewerage and sanitation are based on consumption, using the tariffs approved from Council and are levied monthly.

Interest revenue is recognised on a time-proportion basis.

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

Revenue arising from the application of the approved tariffs of charges is recognised when the relevant services is rendered by applying the relevant gazetted tariff. This includes the issuing of licenses and permits.

Income from agency services is recognised on a monthly basis once the income collected on behalf of agents has been quantified. The income recognised is in terms of the agency agreement.

Finance income from the sale of housing by way of instalment sales agreements or finance leases is recognised on a time proportion basis.

Revenue from the sale of goods is recognised when substantially all the risks and rewards in those goods are passed to the consumer.

1.17 Revenue from non-exchange transactions

Revenue from non-exchange transactions refers to transactions where the municipality received revenue without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the municipality.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

2012 - 11- 28

BREEDE VALLEY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.17 Revenue from non-exchange transactions (continued)

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No.56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain.

When, as a result of a non-exchange transaction, a municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the present obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability will be recognised as revenue.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has compiled with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Property rates

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Revenue from property rates is recognised when the legal entitlement to this revenue arises.

Transfers

Apart from services in kind, which are not recognised, the municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.17 Revenue from non-exchange transactions (continued)

Collection charges and penalties

Collection charges and penalty interest is recognised when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the amount of the revenue can be measured reliably; and
- to the extent that there has been compliance with the relevant legal requirements (if applicable).

Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Where the municipality collects fines in the capacity of an agent, the fines will not be revenue of the municipality.

The following basic principles have been followed in regards of the traffic fines.

- All fines that are due to the municipality legally so were recognised as at 30 June 2014.
- Removed all the fines that have been issued before the 1st of January 2013 where no warrant has been served. As
 they would be older than 18 months.
- Removed all summons that were sent to the server, but were for offences on or before 31 December 2012 because
 regulations state that summons must have been served no later than 18 months from date of alleged offence.
- Removed summons not served as well as fines that would miss their cut off date as per the rules of the court as it can only accompdate one day per week for all traffic related issues.
- Ensure that all the warrants were less than two years old.
- Used the average collection rates based on number of fines issued vs number of fines paid for the past 5 years to determine the fair value of the traffic fines.

Grante

Grants received or receivable are recognised when the resources that have been transferred meet the criteria for recognition as an asset. A corresponding liability is raised to the extent that the grant, transfer or donation is conditional. The liability is transferred to revenue as and when the conditions attached to the grants are met. Grants without any conditions attached are recognised as revenue when the asset is recognised,

Revenue from public contributions and donations

Revenue from public contributions and donations is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment qualifies for recognition and first becomes available for use by the municipality. Where public contributions have been received but the municipality has not met the related conditions, it is recognised as an unspent public contribution (liability).

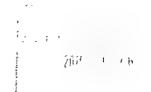

1.18 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets are capitalised to the cost of that asset unless it is inappropriate to do so. It is considered inappropriate to capitalise borrowing costs where the link between the funds borrowed and the capital asset acquired cannot be adequately established. In such cases, the municipality will expense those borrowing costs related to a qualifying asset directly to the statement of financial performance. The municipality ceases the capitalisation of borrowing costs when substantially all the activities to prepare the asset for its intended use or sale are complete. Borrowing costs incurred other than on qualifying assets are recognised as an expense in the statement of financial performance when incurred.

1.19 Unspent conditional government grants and receipts

Conditional government grants are subject to specific conditions. If these specifi conditions are not met, the monies received are repayable.

Unspent conditional grants are financial liabilities that are seperately reflected on the Statement of Financial Position. They represent unspent government grants, subsidies and contributions form the public.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.20 Comparative figures

When the presentation or classification of items in the annual financial statements is amended, prior period comparitive amounts are restated, unless a standard of GRAP does not require the restatement of comparitive information. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparative are restated accordingly.

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year. Refer to the note on prior year errors in the annual financial statements.

1.21 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.22 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the Statement of Financial Performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.23 irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure.

All expenditure relating to irregular expenditure is recognised as an expense in the Statement of Financial Performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.24 Grants in aid

The municipality transfers money to individuals, organisations and other sectors of government from time to time. When making these transfers, the municipality does not:

- receive any goods or services directly in return, as would be expected in a purchase or sale transaction:
- expect to be repaid in future; or
- expect a financial return, as would be expected from an investment.

These transfers are recognised in the Statement of Financial Performance as expenses in the period that the events giving raise to the transfer occurred.

1.25 Accumulated surplus

The accumulated surplus/deficit represents the net difference between the total assets and the total liabilities of the municipality. Any surpluses and deficits realised during a specific financial year are credited/debited against accumulated surplus/deficit. Prior year adjustments, relating to income and expenditure, are debited/credit against accumulated surplus when retrospective adjustments are made.

1.26 Commitments

Items are classified as commitments where the municipality commits itself to future transactions that will normally result in the outflow of resources.

Annual Financial Statements for the year ended 30 June 2014

Accounting Policies

1.26 Commitments (continued)

Commitments are not recognised in the Statement of Financial Position as a liability, but are included in the disclosure notes in the following cases:

approved and contracted commitments;

where the expenditure has been approved and the contract has been awarded at the reporting date; and

where disclosure is required by a specific standard of GRAP.

1.27 Budget information

The approved budget is prepared on the accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2013/07/01 to 2014/06/30.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of Comparison of Budget and Actual amounts.

The budget of the municipality is taken for stakeholder consultative process and upon approval, the approved budget is made publicly available.

Material differences is terms of the basis, timing or entity have been disclosed in the notes to the Annual Financial Statements.

The most recent approved budget by council is the final budget for the purpose of comparison with the actual amounts. A variance of more than 5% between the budgeted and actual is considered material.

1.28 Related parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions or if the related party entity and another entity are subject to common control.

As a consequence of the constitutional independance of the three spheres of government in South Africa, only entities within the local sphere of government are considered to be related parties.

Related parties include:

- Entitles that directly, or indirectly through one or more intermediaries, control, or are controlled by the reporting entity;
- Individuals owning, directly or indirectly, an interest in the reporting entity that gives them significant influence over the entity, and close members of the family of any such individual;

Key management personnel, and close members of the family of key management personnel; and

 Entities in which a substantial ownership interest is held, directly or indirectly, by any person described in the 2nd and 3rd bullet, or over which such a person is able to exercise significant influence.

Key management personnel include:

- All directors or members of the governing body of the entity, being the Executive Mayor, Deputy Mayor, Speaker and members of the Mayoral Committee.
- Other persons having the authority and responsibility for planning, directing and controlling the activities of the reporting entity being the Municipal Manager, Chief Financial Officer and all other managers reporting directly to the Municipal Manager or as designated by the Municipal Manager.

Only transactions within related parties not at arm's length or not in the ordinary course at business are disclosed.

1.29 Events after the reporting date

Events after the reporting date that are classified as adjusting events have been accounted for in the financial statements.

Events after the reporting date that are classified as non-adjusting events have been disclosed in the notes to the financial statements.

1.30 Value Added Tax

The municipality accounts for Value Added Tax is on the cash basis.

BREEDE VALLEY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2014

Notes to the Annual Financial Statements

Figures in Rand	2014	2013

2. New standards and interpretations

2,1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

GRAP 25: Employee Benefits

The objective of GRAP 25 is to prescribe the accounting and disclosure for employee benefits. The standard requires the municipality to recognise:

- a liability when an employee has provided service in exchange for employee benefits to be paid in the future; and
- an expense when the municipality consumes the economic benefits or service potential arising from service provided by an employee in exchange for employee benefits.

The standard states the recognition, measurement and disclosure requirements of:

- short-term employee benefits;
 - all short-term employee benefits:
 - short-term compensated absences:
 - bonus, incentive and performance related payments;
- post-employment benefits: Defined contribution plans:
- other long-term employee benefits; and
- termination benefits.

The major difference between this standard (GRAP 25) and IAS 19(R) is with regards to the treatment of actuarial gains and losses and past service costs. This standard requires the municipality to recognise all actuarial gains and losses and past service costs immediately in the statement of financial performance once occurred.

All amendments to be applied retrospectively.

The effective date of the standard is for years beginning on or after 01 April 2013.

The municipality has adopted the standard for the first time in the 2014 annual financial statements.

The impact of the standard is not material.

GRAP 1 (as revised 2012): Presentation of Financial Statements

Minor amendments were made to the statement of financial performance as well as the statement of changes in net assets.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has adopted the amendment for the first time in the 2014 annual financial statements.

The impact of the amendment is not material.

GRAP 3 (as revised 2012): Accounting Policies, Change in Accounting Estimates and Errors

Amendments were made to changes in accounting policies. A change to the cost model when a reliable measure of fair value is no longer available (or vice versa) for an asset that a standard of GRAP would otherwise require or permit to be measured at fair value is no longer considered to be a change in an accounting policy in terms of the Standard of GRAP on Accounting Policies, Changes in Accounting Estimates and Errors (as revised in 2010).

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has adopted the amendment for the first time in the 2014 annual financial statements.

The Impact of the amendment is not material.

GRAP 9 (as revised 2012): Revenue from Exchange Transactions

Annual Financial Statements for the year ended 30 June 2014

Notes to the Annual Financial Statements

2. New standards and interpretations (continued)

Amendments were made to the scope and definitions.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has adopted the amendment for the first time in the 2014 annual financial statements.

The impact of the amendment is not material.

GRAP 12 (as revised 2012): Inventories

Amendments were made to measurement after recognition.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has adopted the amendment for the first time in the 2014 annual financial statements.

The impact of the amendment is not material.

GRAP 13 (as revised 2012): Leases

Amendments were made to disclosures.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has adopted the amendment for the first time in the 2014 annual financial statements.

The impact of the amendment is not material.

GRAP 16 (as revised 2012): Investment Property

Amendments were made to definitions, measurement at recognition, disposals and disclosure. Changes were made to ensure the consistent application of the principle where assets are acquired in exchange for non-monetary assets when the exchange transaction lacks commercial substance. Furthermore the assessment of significant use of an investment property has been clarified.

All amendments to be applied prospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has adopted the amendment for the first time in the 2014 annual financial statements.

The impact of the amendment is not material.

GRAP 17 (as revised 2012): Property, Plant and Equipment

Amendments were made to measurement at recognition, disposals and disclosure. Changes were made to ensure the consistent application of the principle where assets are acquired in exchange for non-monetary assets when the exchange transaction lacks commercial substance. Furthermore the requirement to disclose property, plant and equipment that were temporarily idle has been clarified.

All amendments to be applied prospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

Annual Financial Statements for the year ended 30 June 2014

Notes to the Annual Financial Statements

New standards and interpretations (continued)

The municipality has adopted the amendment for the first time in the 2014 annual financial statements.

The impact of the amendment is not material.

IGRAP 1 (as revised 2012): Applying the Probability Test on Initial Recognition of Revenue

This interpretation now addresses the manner in which the municipality applies the probability test on initial recognition of both:

- (a) exchange revenue (GRAP 9); and
- (b) non-exchange revenue (GRAP 23).

All amendments to be applied prospectively.

The effective date of the interpretation is for years beginning on or after 01 April 2013.

The municipality has adopted the interpretation for the first time in the 2014 annual financial statements.

The impact resulted in an increase in fines recognised and an increase in provision for impairment on the outstanding balance.

IGRAP 15: Intengible Assets - Website Costs

The interpretation deals with the treatment of the municipality's own website, it concludes that the municipality's own website that arises from development and is for internal or external access is an internally generated intangible asset that is subject to the requirements of the Standard of GRAP on Intangible Assets.

A website arising from development will be recognised as an intangible asset if, and only if, in addition to complying with the general requirements described in the Standard of GRAP on Intangible Assets for recognition and initial measurement, the municipality can satisfy the requirements in paragraph .54, which in particular requires the municipality to be able to demonstrate how its website will generate probable future economic benefits or service potential.

If the municipality is not able to demonstrate how a website developed solely and primarily for providing information about its own products and services will generate probable future economic benefits or service potential, all expenditure on developing such a website will be recognised as an expense when incurred.

A website that is recognised as an intangible asset under this interpretation will be measured after initial recognition by applying the requirements in the Standard of GRAP on Intangible Assets.

interpretation to be applied retrospectively.

The effective date of the interpretation is for years beginning on or after 01 April 2013.

The municipality has adopted the interpretation for the first time in the 2014 annual financial statements.

The impact of the interpretation is not material.

2.2 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2014 or later periods:

Standard/ Interpretation:

GRAP 5 (revised 2013): Borrowing Costs

GRAP 100 (revised 2013): Discontinued Operations
 GRAP 105: Transfers of Functions Retween Entities United States

 GRAP 105: Transfers of Functions Between Entities Under Common Control

Effective date: Years beginning on or after

01 April 2014

01 April 2014

01 April 2015

Annual Financial Statements for the year ended 30 June 2014

Notes to the Annual Financial Statements

2 New standards and interpretations (continued)

GRAP 106: Transfers of Functions Between Entities not 01 April 2015 **Under Common Control** GRAP 107: Mergers 01 April 2015 **GRAP 20: Related Parties** no effective date IGRAP 11: Consolidation - Special purpose entities 01 April 2015 IGRAP 12: Jointly controlled entities - Non-monetary 01 April 2015 contributions by ventures GRAP 6 (as revised 2010): Consolidated and Separate 01 April 2015 Financial Statements

GRAP 7 (as revised 2010): Investments in Associates 01 April 2015 GRAP 8 (as revised 2010): Interests in Joint Ventures 01 April 2015 GRAP 32: Service Concession Arrangements: Grantor no effective date GRAP 108: Statutory Receivables no effective date no effective date

IGRAP 17: Service Concession Arrangements where a Grantor Controls a Significant Residual Interest in an Asset

2.3 Standards and interpretations not yet effective or relevant

The following standards and interpretations have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2014 or later periods but are not relevant to its operations:

GRAP 18: Segment Reporting

Segments are identified by the way in which Information is reported to management, both for purposes of assessing performance and making decisions about how future resources will be allocated to the various activities undertaken by the municipality. The major classifications of activities identified in budget documentation will usually reflect the segments for which an entity reports information to management.

Segment information is either presented based on service or geographical segments. Service segments relate to a distinguishable component of an entity that provides specific outputs or achieves particular operating objectives that are in line with the municipality's overall mission. Geographical segments relate to specific outputs generated, or particular objectives achieved, by an entity within a particular region.

The standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance.

The municipality expects to adopt the standard for the first time once it becomes effective.

The adoption of this standard is not expected to impact on the results of the municipality, but may result in more disclosure than is currently provided in the Annual Financial Statements.

m

Change in accounting estimate

including it in surplus or deficit in the period of the change, if the change affects that period only; or the period of the change in facts both. Management concluded that it should apply the change in estimate prospectively from the start of 2014 and therefore the depreciation charge was applied prospectively from 1 July 2013 over the remaining useful life of A review of useful lives was done on assats. During the review certain infrastructure and other property plant and equipment with Roll book values and nil remaining lives were identified. The entity's menagement considered how to account for the change in the estimated useful lives. The effect of a change in accounting estimate is required to be recognised prospectively by these assots. The offect of the change in accounting eatimals is further disclosed in note 54,

Prior period error

these assets being fully depreciated over a shorter useful life but still in use. This constitutes a prior period error and was corrected retrospectively in accordance with GRAP 3. The effect of the A review of useful lives was done on assels. During the review of useful lives cattain infrastructure and other property plant and equipment mappropriate useful lives were identified resulting in prior pariod error is further disclosed in note 43.

Worcestor- and De Dooms Landfill rehabilitation asset were not recognised in 2010 on initial recognition. This resulted in Other property, plant and equipment being understatement. The effect of the prior pariod arrar is further disclosed in note 43.

Other Information

Aregister containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

The total cost of fully depreciated assets still in use amounts to P.4,777,430. Those are items that do not have an active market and carnot be sold when it is no fonger in use. Refer to Appendix 3 for more detail on property, plant and equipment.

Annual Financial Statements for the year ended 30 June 2014 (2013 Restated)

Notes to the Financial Statements

Figures in Rands	****	2013
S-1-2- III III III	2014	2010
		(Restated)
		(LCGREGERIE)

Long term receivables (continued) Housing Selling Scheme Loans

Housing loans are granted to qualifying Individuals in terms of the provincial administration's housing programme. These loans attract interest of prime plus 1 % per annum and are repayable over a maximum period of 30 years.

Welfare Loans

Welfare loans are granted to qualifying organisations in terms of the provincial administrator's housing programme. These loans attract interest at prime plus 1% per annum and are repayable over a maximum period of 30 years.

Housing Loans - Personnel

Housing loans were granted to personnel and attract interest at between 7.5% and 15% per annum and are repayable over periods not exceeding 30 years.

Recreational Loans

Loans are granted to certain recreational institutions and attract interest at rates between 11.25% and 18% per arenum, and are repayable over periods not exceeding 30 years.

Land Sales

Loans were granted to individuals for purchasing land from the Municipality. These loans attract interest at prime plus 1% and are repayable over periods not exceeding 2 years.

Arrangements

The arrangements consist of consumer debtors with whom the council has negotiated repayment terms. Those arrangements attract no interest and the repayment periods vary between 15 and 30 years.

As at 30 June 2014, long term debtors of R 9,246,316 (2013 R 10,167,002) were past due not impaired. The ageing of these long term receivables are more than 365 days as long term debtors are classified as non-current assets in the financial Statements.

As of 30 June 2014, long term receivables of R 4,878,720 (2013; R 7,138,267) were impaired. The individually impaired receivables mainly relate to those debtors who have agreements with the municipality to pay their debt over a long period. The ageing of these individually impaired receivables is more than 365 days based on the nature of long term receivables.

Trade and other receivables past due but not impaired

The Council regards consumer debtors to be due for outstanding amounts more than 30 days to be past due. The Impairment of consumer debtors is calculated based on the historic payment rate per individual debtor.

62 912 430

68 928 342

As of 30 June 2014, trade receivables of R 28,673,629 (2013: R 36,185,083) were fully performing.

As of 30 June 2014 consumer debtors of R 34,238,802 (2013; R 32,926,668) were past due not impaired. These relate to a number of independent customers for whom there is no recent history of default. The ageing analysis of these trade receivables is as follows:

711.1 11 1 h

BREEDE VALLEY MUNICIPALITY

Annual Finencial Statements for the year ended 30 June 2014 (2013 Restated)

Notes to the Financial Statements Figures in Rands	2014	(Restated)
11. Consumer debtors from exchange and	non-exchange transactions (continued)	
	2014	2013

The alocations and subsidies received from National and Provincial Government as well the District Municipality, has been deposited into the Council's own bank account. The allocations received have been utilised in accordance with the conditions set. Where all the conditions have not yet been met, the total allocations have not been utilised. The outstanding conditions will be met prior to/or when the balance of the allocations is utilised. The percentage of the allocations utilised is an indication of the conditions met. Where the total of the allocations has been utilised, all the conditions have been met. Also refer to Appendix D for further detail regarding unspent conditional grants.

17. Retirement benefit

Dafined benefit plan

Post-Ratirement medical aid benefit

Current and continuation members receive a 60% and 70% subsidy respectively of medical and contributions in retirement. The spouse and child dependants of an employee are entitled to a 60% and 70% subsidy respectively of their contributions is the event of the principal members' death in-service. In the event of the death of the principal member, the spouse becomes the principal member.

In 2014, 55% (2013: 55%) of the employees belonged to the above plan. The plan is defined as a post-retirement medical benefit plan.

Annual Financial Statements for the year ended 30 June 2014 (2013 Restated)

Notes to the Financial Statements		
	2014	2013
Figures in Rands	2014	(Restated)

17. Retirement benefit (continued)

Long service awards

All permanent employees are entitled to a specified number of day's additional leave based on their service. The employee may convert the additional leave into a cash amount.

In 2014, 8% (2013: 11%) of the employees qualified for long service awards.

Sonaltivity analysis

2013/2014

The value of the liabilities is particularly sensitive to the assumed rate of healthcare cost inflation. The table below sets out the sensitivity of the valuation result to a 1% increase and 1% decrease in the assumed healthcare cost inflation assumption.

Healthcare cost inflation sensitivity (R'000)				
	1% decrease	Base (9.00%)	1% increase	
Defined Benefit Obligation	(121 066)	(143 201)	(171 527	
Service Cost (Next Financial Year)	(4 826)	(5 955)	(7 755	
Interest Cost (Next Financial Year)	(11 507)	(13 679)	(16 450	

2012/2013

The value of the liabilities is particularly sensitive to the assumed rate of healthcare cost inflation. The table below sets out the sensitivity of the valuation result to a 1% increase and 1% decrease in the assumed healthcare cost inflation assumption.

Healthcare cost Inflation sensitivity (R'000)				
	1% decrease	Base (6.10%)	1% increase	
Defined Banefit Obligation	(103 051)	(121 382)	(144 629)	
Service Cost (Next Financial Year)	(4 004)	(5 109)	(6 600)	
Interest Cost (Next Financial Year)	(9 274)	(10 956)	(13 128	

Key assumptions used

The municipality made use of an independent firm to perform the valuation of post-retirement medical aid benefits and long service awards. The key assumptions used by the experts are listed below for the last valuation on 30 June 2014.

Post-Retirement medical aid benefit Discount rates Health care cost inflation	9.50% 9.00%	9.00% 8.10%
Long service swards Discount rate Salary inflation	11.30W 9.00%	7.80% 8.10%

Cape Joint Retirement and Pension Fund for Local Government

This studi-employer was established with effect form 1 May1996 to provide insured death, disability and pension benefits to its members.

The contribution rate for members is 7.5% of basic salary, whilst the respective Local Authorities are contributing 19.5%.

This chined benefit plan is accounted for as a defined contribution plan as the municipality's liability in the proportionate share of actuarial gains and losses cannot readily be determined.

As at 30 June 2012 the funding level of the share account was 99,9% and the pension account was 108%. At the value ton date the municipality had 497 members (Fund: 33 979 members) and nil pensioners (Fund: 780 pensioners) belonging to the fund.

		(Restated)

17. Retirement benefit (continued)

Defined contribution plan

It is the policy of the municipality to provide retirement benefits to 640 (2013:594) employees. A number of defined contribution provident funds, all of which are subject to the Pensions Fund Act exist for this purpose.

The municipality is under no obligation to cover any unfunded benefits.

The last valuation of the SAMWU National Provident Fund was done on 30 June 2008. The last valuation of the SALA Pension Fund was done on 1 July 2013. The last valuation of the Cape Joint Retirement Fund was performed on 30 June 2013

The valuators of the respective funds were satisfied that the plan is in a sound financial position.

		5 938 621	

Operating lease payments represent rentals payable by the municipality for certain of its office equipment. Payments made under operating leases are recognised in the Statement of financial performance on a straight-line basis over the period of the lease. The impact of straight lining has been a decrease in current year expenditure of R 110,602 (2013; R 170,108).

Other debtors	22 540 401	-	22 540 401
Long-term receivables	21 778 290	-	22 265 559
Investments in fixed deposits	•	30 000 000	30 000 000
Cash and cash equivalents	121 988 885		121 988 885
Parrel Filth indexts medant men, 1900	268 511 157	30 000 000	298 998 426

Credit quality of financial assets

The credit quality of financial assets that are neither past due nor impaired can be assessed by reference to historical information about counterparty default rates:

Consumer debtors

Collection Approve			
Consumer debtors		28 673 629	36 185 <u>083</u>
Cash at bank and short-term ba	nk deposits		404.050.000
F2	ABSA	82 173 774	121 959 990
F2	ABSA	20 000 000	-
	Nedbank	20 000 000	10 000 000
F3 .	Invested	15 000 000	20 000 000
F3	FNB	-	
	Standard Bank	20 000 000	
F3	Ciciono baix	167 173 774	151 959 990

F1 - Highest credit quality. Indicates the strongest capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature

F2 - Good credit rating. A satisfactory capacity for timely payment of financial commitments, but the margin of safety is not as great as in the case of higher ratings.

F3 - Fair credit rating. The capacity for timely payment of financial commitments is adequate; however, near term adverse changes could result in a reduction to non-investment grade

46. Risk management

Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an on-going review of future commitments and credit facilities. Prudent liquidity risk management implies maintaining sufficient cash and investments, the availability of funding for service delivery through effective budgeting and availability of credit facilities. The municipality manages its risks through effective and efficient budgating and credit control. The liquidity risk is thus limited.

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

The table below analyses the municipality's financial liabilities and net-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

Figures In Rands	2014	(Restated)

Interest rate risk

At 30 June 2014, if interest rates on Rand-denominated trade receivables had been 0.5% higher/lower with all other variables held constant, post-tax surplus for the year would have been R 705 006 (2013 - R837,684) lower/higher, mainly as a result of higher/lower interest income on past due trade receivables.

In order to hedge the fair value interest rate risk, borrowings are made at fixed rates and investments are not made for periods exceeding 12 months. Borrowing issued at fixed ratings expose the municipality to fair value interest rate risk.

The municipality's has a low interest rate risk as a long-term borrowing is made on a fixed interest rate. All financial assets except trade debtors bears a fixed interest rate.

At year end, financial instruments exposed to interest rate risk were as follows:

- Consumer debiors

Credit risk

Credit risk is managed by debt collection department. The credit risks, rates and consumer debtors, are managed in terms of the credit control and debt collection as well as the indigent relief policies.

Credit risk consists mainly of cash deposits, cash equivalents and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an on-going basis. There is no independent rating, risk control assesses the credit quality of the customer, taking into account past experience with the client's payment rate. Sales to customers are settled in cash or using major credit cards, Credit guarantee insurance is purchased when deemed appropriate.

Financial assets exposed to cradit risk at year-end were as follows:

Financial instrument	2014	2015
Other debtors Long term receivables Investments in other deposits Cash and cash equivalents	59 585 472 18 483 050 85 000 000 62 173 774 245 242 296	22 540 401 21 778 290 30 000 000 121 988 865 198 307 558

Price risk

The municipality is not exposed to equity securities price risk as no investments are made by the municipality in equity securities on the consolidated statement of financial position either as available for sale or at fair value through surplus or deficit.

47. Going concern

The financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

46. Events after the reporting data

During July 2014 the movable assets to the value of R 381,868 was acquired from Worcester Agricultural Association (Kleinplasie) of which an settlement amount of R 20,000 was paid by the municipality.

A Sattlement agreement for the contingent asset of SARS regarding the dispute with SARS regarding VAT has been reach for an amount of R 799 653.98

Notes to the Financial Statements

Figures In Rands	2014	2013
	2717	(Restated)

49. Unauthorised, irregular, fruitiess and wasteful expenditure

Unauthorised expanditure - expanditure exceed budget

		Budget	Actual	Vadance
Council General: Admin	Provisions	25 145 482	28 786 245	(3 640 783)
Community Services: Traffic	Provisions	136 768 715	153 817 485	(17 048 770)
Technical Services	Provisions	447 949 728	472 033 933	(24 084 205)
		609 863 905	654 637 663	(44 773 758)

Details of unauthorised expanditure

Bad Debts: IGRAP 1 was effective from this financial year and indicates that non-payment in exchange and non-exchange revenue transactions should be considered when assessing impairment. There were significant uncertainties on the treatment and application of IGRAP1, which made it difficult for the municipality to predict and budget for.

Employee Benefits: Provision calculations are done by the actuaries and are based on various assumptions which are inflation based and difficult to accurately budget for,

Provision Fines: iGRAP 1 was effective from this financial year however there were significant uncertainties on the treatment and application of iGRAP1, which made it difficult for the municipality to predict and budget for.

Depreciation of landfill site: Provision variance was as result of incorrect accounting treatment in the previous financial years. The landfill assets were not previously recognised and depreciation therefor not budgeted for.

53. Change in accounting estimate

Property, plant and equipment: A review of useful lives was done on assets. During the review, cartain infrastructure and other property plant and equipment with Rnil book values and nil remaining lives were identified. The entity's management considered how to account for the change in the estimated useful lives. The effect of a change in accounting estimate is required to be recognised prospectively by including it in surplue or deficit in the period of the change, if the change affects that period only; or the period of the change in future periods, if the change affects both. Management concluded that it should apply the change in estimate prospectively from the start of 2014 and therefore the depreciation charge was applied prospectively from 1 July 2013 over the remaining useful life of these assets.

The effect of the change in accounting estimates due to the review of useful lives and residual values is as	2014 R	2015 R	2016 R
Decrease/(increase) in depreciation on infrastructure assets for the year	1 972 240	1 589 329	(890 764)
Decrease/(increase) in depreciation on other assets for the year	116 859	(15 526)	(52 623)
	2 089 099	1 573 803	(943 387)

A review of useful fives was done on assets. During the review certain infrastructure and other property plant and equipment with Rnil book values and nil remaining lives were identified. The effect of a change in accounting estimate is required to be recognised prospectively by including it in surplus or deflicit in the period of the change, if the change affects that period only; or the period of the change in future periods, if the change affects both. The change in accounting estimate has been applied prospectively from the start of 2014. The effect on the current year is to increase the carrying amount of property, plant and equipment by R 2,089,099 and decrease the depreciation expense by R 2,089,099.

Annual Financial Statements for the year ended 30 June 2014 (2013 Restated)

54. Change in accounting policy

HERITAGE ASSETS

The municipality implemented GRAP 103 on Heritage Assets. A heritage committee was established with Mr Tertius Smith of the Heritage council of Worcester as the chairperson of the committee. The municipality also scrutinised the Asset Register to check if any of the assets fall within the definition and recognition criteria of Heritage Assets. The Implementation was done retrospectively and restated for 01 July 2012.

55. Deviation from Supply Chain Management regulations

In terms of section 38 of the Municipal Supply Chain Management Regulations any deviation from the Supply Chain Management Policy needs to be approved/condoned by the Accounting Officer and noted by Council.

Paragraph 12(1)(d)(i) of Government gazatte No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazetic states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the annual financial statements.

During the financial year under review goods/services totalling R 27,319,442 were procured and the process followed in procuring those goods/services deviated from the provisions of paragraph 12(1)(d)(i) as stated above. The reasons for these deviations were documented and reported to the accounting offices that considered them and subsequently approved the deviation from the normal supply chain management regulations.

A detailed list of deviations is in Appendix K available and on the municipality's website.
